Hey Matthew--

Thanks for considering...may be too complicated to make it worthwhile.

Task: They need to know phrase expansion types by name (passing, pedal, etc.) and know which RN/FB pairings go with each one.

Activity 1: Computer asks them for a passing bass. They have three menus to choose from:

Solfege: Do Re Mi Fa Sol La Ti Do

RN: I ii iii IV V vi vii0

FB 5/3, 6/3, 6/4, 6/5, 4/3, 4/2

They need to select the right combination of things that will yield a passing bass. The tricky bit could be that there are multiple right answers to this--Do Re Mi and Mi Re Do are both correct, and for either one of those there are several combinations of RN and FB that are also correct.

One possible right answer:

Do Re Mi on the first line

I V I on the second line

5/3, 6/4, 6/3 on the second line

Another right answer:

Do Re Mi on the first line

I V I on the second line

5/3, 4/3, 6/3 on the second line

There are maybe 8-12 expansions, with at most up to 6 or 8 right answers for each expansion. (Most expansions are less than that but some have several right answers. I can easily send you a detailed list of what all of the right answers would be in all cases, and after that maybe it's just a matter of IF statements to evaluate whether or not they picked one of the right answers?

Activity 2--really if they can get task 1 going it would solve most of my problems. But activity 2 would be useful. Here they would need to construct a phrase model under certain constraints.

Example: Computer asks them for a phrase model containing a passing bass, a DN motion bass, and a PED bass. Also asks for a phrase ending in a HC and a PAC. They would need to sort of drag-and-drop or use drop-down menus to put in a bunch of labels and so forth, filling in 8 measures of music.

Activity 2 sounds like a nightmare and given that starting next week we are doing even more crazy stuff with it...Activity 1 would be a big help without the rest.

But seriously if you don't have time--this is something that they can/should learn on their own as well. Just trying to think of ways to help them...

Thanks for considering. How's Austin?

Love,

Jennifer
